Sun City West Fire District Reinforces Newer Smoke Alarm Recommendations during Fire Prevention Week, October 3-9, 2010

(SUN CITY WEST, AZ), (SEPTEMBER 17), 2010 – In an effort to better educate communities throughout the U.S. about smoke alarm recommendations, the nonprofit National Fire Protection Association (NFPA) is promoting “Smoke Alarms: A Sound You Can Live With!” as the theme for this year’s Fire Prevention Week campaign, October 3-9, which the Sun City West Fire District is supporting locally. NFPA has been the official sponsor of Fire Prevention Week for 88 years.

“Many homes in Sun City West and surrounding communities may not have any smoke alarms, not enough smoke alarms, alarms that are too old, or alarms that are not working,” says Holli Sandeen, community outreach specialist of the Sun City West Fire District. “We want residents to understand that working smoke alarms are needed in every home, on every level (including the basement), outside each sleeping area and inside each bedroom. And, if a smoke alarm is 10 years old or older, it needs to be replaced.”

According to Sandeen, smoke alarms can mean the difference between life and death in a fire. NFPA statistics show that working smoke alarms cut the chance of dying in a fire nearly in half. But they must be working properly to do so. The association’s data shows that many homes have smoke alarms that aren’t working or maintained properly, usually because of missing, disconnected or dead batteries. Roughly two-thirds of all

home fire deaths result from fires in homes with no smoke alarms or no working smoke alarms.

The Sun City West Fire District will be hosting activities on October 7, 2010, at the RH Johnson Recreation Center Social Hall from 9:00-12:00 p.m. during Fire Prevention Week to promote “Smoke Alarms: A Sound You Can Live With!” , and to help residents understand NFPA’s smoke alarm recommendations. Through these educational activities, residents can learn more about the power of smoke alarms, newer options for installing and maintaining them properly, and ultimately, how to better protect their loved ones from fire.

NFPA and the Fire District agree that interconnected smoke alarms offer the best protection; when one sounds, they all do. This is particularly important in larger or multi-story homes, where the sound from distant smoke alarms may be reduced to the point that it may not be loud enough to provide proper warning, especially for sleeping individuals.

“Most people have a sense of complacency about smoke alarms because they already have one in their homes. Fire Prevention Week provides an excellent opportunity to re-educate people about smoke alarms, new technologies, and expanded options for installation and maintenance,” says Chief Rob Biscoe. “Ultimately, we want this year’s campaign to serve as a call to action for community members to inspect their homes to ensure that their families have the full smoke alarm protection that’s recommended.”

Sun City West Fire District offers the following tips for making sure smoke alarms are maintained and working properly:

- Test smoke alarms at least once a month using the test button, and make sure everyone in your home knows their sound.
- If an alarm “chirps or beeps,” warning the battery is low, replace the battery right away.
- Replace all smoke alarms, including alarms that use 10-year batteries and hard-wired alarms, when they are 10 years old (or sooner) if they do not respond properly when tested.
- Never remove or disable a smoke alarm.

For additional information on smoke alarms or to schedule a free home safety inspection in Sun City West, please contact the Sun City West Fire District at (623) 584-3500 or visit us on the web at www.scwfire.org.
